

## **Inspicio company, Inspectorate, open new laboratoy in Russia**

We are delighted to announce that our Inspectorate Russian Group company "Inspectorate R" has established, installed and commissioned a new precision Oil & Petrochemicals laboratory testing facility at Nakhodka (a major ocean port strategically located within the centre of industry and transport activity in the Russian Far East).

The new laboratory is located in Primorskiy Industrial area and offers both testing and inspection services for bunkers and other oil products. Looking forward, it is planned to provide quality inspection for coal and fertilizers from this new laboratory facility.

This exciting new facility will not only complement Inspicio's existing activities in the Russian Far East but, but will also be of significant interest to our international clients who regularly ship in and out of Russian Far East ports.

Contact details of this new facility are:

59, Nakhodkinskiy prospect,
