

Inspicio and Inspectorate attending PDAC in Toronto

Inspicio company, Inspectorate, will be attending the PDAC in Toronto, (March 1-4). Please join us at booth number: 546

Inspicio are excited to announce International Plasma Labs (IPL) as our new Inspectorate Vancouver laboratory and Process Research Associates (PRA) as our new Inspectorate Metallurgical Division. We will be hosting a stand together with our new colleagues from PRA and IPL. The PRA group was acquired by Inspicio through Inspectorate during 2008 and operates out of Vancouver, BC.

PRA Metallurgical Division represents a diversification of service for Inspicio that is highly complementary to our existing Exploration and Mining Services. PRA assist clients worldwide in beneficiation of metals and minerals. Their services include Mineral Processing (bench to pilot plant), Hydrometallurgy and Bi-Hydrometallurgy. We are excited at the opportunity the PDAC represents to discuss this expansion of services with you further.

IPL in Vancouver adds to an Inspicio network that boasts state-of-the-art geoanalytical labs in Reno, USA, Perth, Australia, Lima, Peru and Kendari, Indonesia. These strategic locations serve a wider network of satellite sample preparation and mine site laboratories.
