

Inspicio introduces Inspectorate Sharp Global (ISG)

Based in New York City, ISG will combine the global reach of the Inspectorate network and the technical expertise of Sharp Global to offer high quality, managed audits to the global trade community.

Supply chain security and vendor due diligence have become increasingly scrutinized aspects of international trade. Successful trade transactions depend on secure, safe and dependable supply chains. In order to ensure compliance, governments around the world are strengthening reporting requirements forcing both importers and exporters into a heightened level of accountability.

This joint venture immediately positions ISG to become a global leader for site inspection, assessments and audits for US' C-TPAT and EU's AEO schemes, chemical security, transportation security and other supplier accountability programs. In addition, ISG will provide clients technical training services throughout all levels of their organization and supply chain.
