Inspicio food division launches a new premium '3-day turnaround' service on nutritional testing

As part of its ongoing commitment to meet the needs of its customers, Inspicio company, Eclipse Scientific Group, are pleased to announce the launch of a fast-track 3-working day nutritional testing service. This service is available for samples requiring a rapid Group 1, Group 2 or Meat Content analysis and is offered as a premium service for clients who require results to be available as a matter of extreme urgency. Normal turnaround times are between a standard 5-day and 10-day lead-time.

To take advantage of this service, customers just need to phone the Customer Service Team (01354 697 028) who will record sample details and provided there is sufficient capacity to analyse the requested submission, a reference number will be verbally issued, which will be followed immediately by an email confirmation.

All analyses are conducted using the same UKAS accredited procedures that are used for Eclipse Scientific Group's standard 5 and 10 day turnarounds and all results generated are supported by its robust in-house Quality Control systems ensuring the integrity of results at all times.
